| Maximum Marks | 4 Marks   |

## **Data Flow Diagrams:**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

## **USER STORIES:**

| User Type                  | Functional<br>Requirement<br>(Epic) | User Story<br>Number | User Story / Task  | Acceptance criteria   | Priority | Release  |
|----------------------------|-------------------------------------|----------------------|--|---|----------|----------|
| Customer (Web Reuser)      | Registration                        | USN-1                | As a user, I can register for the application by entering my email, password, and confirming my password.  | I can access my account / dashboard                                   | High     | Sprint-1 |
|                            |                                     | USN-2                | As a user, I will receive confirmation email once I have registered for the application  | I can receive confirmation email & click confirm                      | High     | Sprint-1 |
|                            |                                     | USN-3                | As a user, I can register for the application through Gmail.   |   | Medium   | Sprint-1 |
|                            | Login                               | USN-4                | As a user, I can log into the application by entering email & password.  | I can get to access my web portal                                     | High     | Sprint-1 |
|                            | Dashboard                           | USN-5                | As a user, I can get to know what my dashboard consists of.  | I can my details of my registration.                                  | Low      | Sprint-2 |
| Customer Care<br>Executive | Organization                        | USN-6                | The organization which owns this airplane analysis system will enable the option to customers to reach out the organization if  they have any problem with the organization's system of customer interaction or  airplane issues- delay, landing in a different location | The customer care workers will help out the customers in trouble.     | High     | Sprint-1 |
| Administrator              | Administration                      | USN-7                | The organization takes in-charge of the administrative policies of different departments like:  • registration • flight booking • delay visualization • generation of delay report   | As an administrator, confirmation of user while registration is done. | High     | Sprint-1 |
